

SYSTEM 45

schiaavello

System 45

System 45 panels are simple to understand, plan and install. Complete rigidity is achieved with an economy of parts and materials. A breakthrough design that combines elegant simplicity, with strength and quality engineering.

Schiavello's System 45 panels have been designed to allow a speedy installation, reconfiguration and relocation. The system uses base panels and stackable add-on panels in various heights and widths. All panels are 45 mm thick, with

junctions available in 90°, 120° and 180°. Available as standard or acoustic panels in perforated metal or fabric covered, the base panels are capable of supporting up to two add-on panels.

Schiavello's concepts and products are developed in Australia by applying a design process that brings together the company's core design principles and engineering with the creativity of local and international designers.

The Schiavello head office and world-class manufacturing facilities are integral to our continually developing rich tapestry of knowledge. This knowledge ultimately assists us in informing the right solutions and tools for each organisation's needs and people, allowing us to consistently achieve our philosophy that 'Anything is possible'.
